

# FMEA Executive

AIAG-VDA Edition

**Make your FMEAs effective!  
Take them beyond mere documentation!!**

A Software for Failure Mode & Effects Analysis  
based on AIAG-VDA Harmonized FMEA Handbook

- ✓ Design & Process FMEA
- ✓ Seven Step process
- ✓ Build Individual, Family & Foundation FMEAs

- ✓ Structure trees, Function Nets, Failure Chains
- ✓ Evaluate Risk & Action Priority
- ✓ Take actions and Prevent Failures

- ✓ Reports in Standard format
- ✓ Knowledgebase search. Solve problems faster
- ✓ Prioritize actions. Manage by exception.

The screenshot shows a table of failure details. The table has columns: Cause, Effect, Action, Status, Action Taken, Completion Date, Sev, OCC, DET, AP, Remarks. The table contains two rows of data. The first row is for 'Slide stop out of tolerance' with a cause of 'Positive location implemented' and an action of '4 - Setting page'. The second row is for 'Variation in Tool setting' with a cause of 'Tool setting stopper installed' and an action of '5 - None'.

Cause	Effect	Action	Status	Action Taken	Completion Date	Sev	OCC	DET	AP	Remarks
Slide stop out of tolerance	Positive location implemented	4 - Setting page	Open	Action taken and verified		8	2	1	1	
Variation in Tool setting	Tool setting stopper installed	5 - None	Open
